Maximum Marks	2 Marks

Question 1:

Pull an Image from docker hub and run it in docker playground.

The screenshot shows the Docker Hub page for the repository `uifd/ui-for-docker`. The page includes the repository name, a star icon, and a note that the repository is deprecated and development continues at `portainer/portainer`. It also displays the Docker Pull Command: `docker pull uifd/ui-for-d`.

The screenshot shows the Docker Playground interface. On the left, there is a sidebar with a clock showing 03:42:30, a 'CLOSE SESSION' button, and a list of instances. The main area displays the instance details for `cd9an2u3_cd9av060qau0008hbjso`, including its IP address (192.168.0.13) and SSH command. Below this, there is a terminal window showing the execution of the following commands:

```
# This is a sandbox environment. Using personal credentials is HIGHLY discouraged. Any consequences of doing so are completely the user's responsibilities.
# The PWD team.
